MATERIAL HANDLING

Carton/Case Flow System

Carton/Case Flow

Rack System

Carton/Case Flow Rack Systems are designed for picking of full and or split cases utilizing gravity flow lanes.

As the items are removed from the front, the items behind slide forward in place of the previous. Case Flow Rack Systems, separate picking and stocking aisles for full cartons and split cases to save up to 80 percent of labor cost compared to a static storage system. (FIFO System)

Advantages

- Always has product presented to the order picker/product picker
- Allows quick and smooth picking (full and/or split cases) using gravity
- FIFO automatic inventory rotation increases productivity and utilization of space
- Improve product visibility and order accuracy
- Designed to be flexible with ergonomics in mind
- Can Retro-fit into existing rack systems

Loading Side

Picking Side

Applications

- High volume, fast moving SKU's packaged in cartons, boxes or stored bins
- Allow quick and smooth picking (full and/or split cases) using gravity flow
- FIFO (First In/First Out) automatic inventory rotation increases productivity and utilization of space
- Improve product visibility and order accuracy
- Designed to be flexible with ergonomics in mind
