

1STOP

MATERIAL HANDLING

Keg Flow Rack Systems

Keg Flow

Storage Systems

1 Stop Material Handling can assist with designing and supplying Keg Flow Rack System to store 1/6 Kegs and 1/4 Quarter Slim Kegs on the bottom or lower levels of existing racking systems for quicker picking and efficiency.

The bottom two beam levels are ideally suited to house 1/6 Kegs and 1/4 Quarter Slims. This will organize all your slow movers into one designated area for ease of picking, which also frees up space for faster moving products.

Advantages

- More efficient picking
- Gets Kegs off the floor
- Frees up space for fast movers
- Organizes slow movers and microbrewers
- Can pick/load from either side of the rack
- Store more product in the same footprint

Advantages

- More efficient picking
- Gets Kegs off the floor
- Frees up space for fast movers
- Organizes slow movers and microbrewers
- Can pick/load from either side of the system
- Store more product in the same footprint

Design Example

Let's take a bay size which is usually 96" Wide X 96" Deep; this bay size will house 8 kegs wide X 9 Kegs Deep for a total of 72 Kegs per level x 2 levels = 144 keg locations.

We provide

We provide services such as layout drawings, seismic calculations, signed and sealed calculations, installations and permits if required.

We are one stop shopping for both your racking systems and all of your accessory products for your warehouse.

Who We are

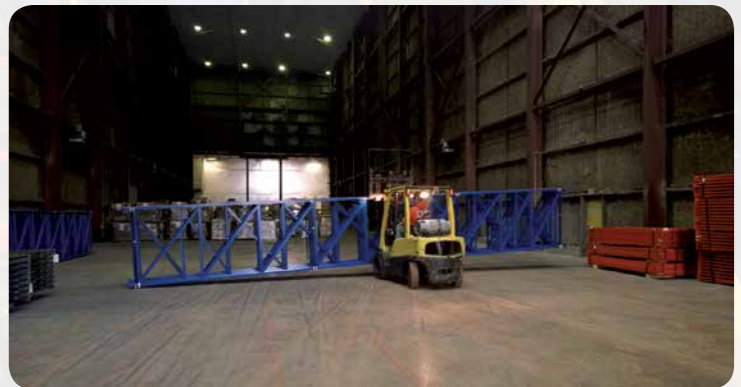

1 Stop Material Handling's expertise lies in system integration for custom design, supply, service and installation. Chances are if you're reading this brochure that you're trying to lift, move, pack or store something.

Our team specializes in the design and implementation of turn-key racking and shelving systems for your warehouse needs.

What We Do

We have 25 years of experience in storage and material handling systems. We will work with you and your team, to design and integrate the most functional, high density and safe storage or rack-ing system to meet your companies needs.
