MATERIAL HANDLING

Pallet Flow Rack Systems

Pallet Flow Storage System

Pallet Flow Systems are engineered to perform and manufactured to last. 1 Stop Material Handling offers custom solutions for any application whether it's economical shallow depth or deep lane flow systems even in harsh environments.

1 Stop Material Handling understands that properly designed SKU zones will maximize storage capabilities for time sensitive and consumer good.

Design consideration must account for empty storage space inherited by broken stack loss or honeycombing. the height requirement is unavoidable. Dictated by the required incline, this is especially important in large or deep bay systems

Advantages

- High Density Storage utilizes space with fewer aisles.
- First in, First out (FIFO) storage insures product rotation
- Pick aisle faces are constantly stocked
- Product flows from the back to the front
- Aisle frontage is only required at the first location of the supply and discharge ends of the flow lanes

Applications

- Fast moving product with FIFO stock rotation
- Time sensitive large volume and consumer goods
- Freezers and areas where maximum storage volume is required
- Any customer where the rotation of the perishables is critical

Who We are

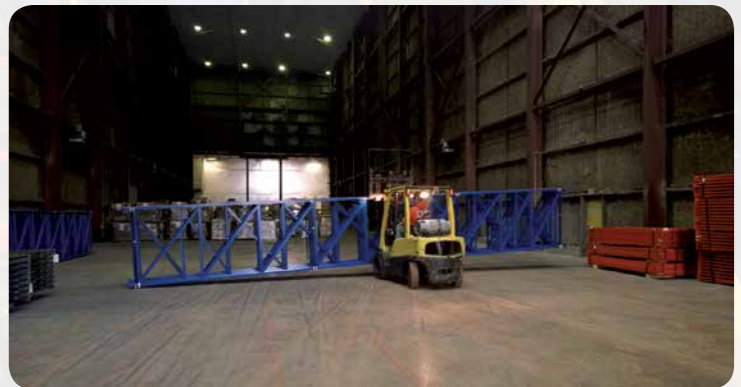

1 Stop Material Handling's expertise lies in system integration for custom design, supply, service and installation. Chances are if you're reading this brochure that you're trying to lift, move, pack or store something.

Our team specializes in the design and implementation of turn-key racking and shelving systems for your warehouse needs.

What We Do

We have 25 years of experience in storage and material handling systems. We will work with you and your team, to design and integrate the most functional, high density and safe storage or rack-ing system to meet your companies needs.
